MESSAGE FROM MD'S DESK

GARUD[®]
Future of Agriculture

GARUD symbolizes soaring flight and vision of the eagle.

Mr. Akash Jain
(DIRECTOR)

GARUD has been manufacturing agricultural implements since more than two decades now. Since our inception in 2006, Garud has developed a capacity to manufacture 75 thousand implements in a year.

All implements have been designed on the latest software & with a highly competent design team. We constantly work towards innovations & technologies in order to craft precise, affordable as well as durable implements as per the need of the customer so as to make GARUD - The Future Of Agriculture. We follow high ethics and system of principles which has been implicated in the entire team of Garud .

India is the largest market of tractors. As per my perception, if you believe in something you will get it, so with that believe My Mission is that all tractors are attached with Garud implements .

We are committed to provide 100 % crop solutions to our customers . We are very proud of serving our farmers and will continue to do so.

No part of this catalogue may be reproduced, stored in a retrieval, or transmitted in any form or by any mean. The Company reserves right to change Design & aesthetics without prior notice due to our continuous R&D efforts for product improvements.

MESSAGE FROM MD'S DESK

GARUD[®]
Future of Agriculture

GARUD symbolizes soaring flight and vision of the eagle.

Mrs. Shyamli Jain
(DIRECTOR)

Business is a Team sport. It is not about one person, we have a great team here at Garud.

We have some of the finest hardworking professionals in our team with high levels of commitment & I am excited to build upon this team, as we continue to grow GARUD and make it a premier Solution Providing Company to the Farmers.

My focus here is to give people the resources they need, to continue delivering the highest Quality product. The work culture we have here is about getting the work done, about finding solutions and about getting inspired.

We are committed to a better tomorrow for all by minimizing our carbon footprints and I believe that this is something that all companies should address.

Our Hero is the Farmer, Everything we do here is about the farmer. We are working towards bringing a revolution in the farming community to use Garud Implements for a better Yield, better income while retaining the fertility of the soil.

Our Mission is to see a satisfactory smile on their faces.

Company Introduction

19 YEARS OF EXCELLENCE

After two decades in business, one thing is very clear – we could not have reached this impressive milestone without the incredible work of our dedicated GARUD team members and the commitment of our loyal customers and dependable partners around the world.

Over the past 18th years, our industry has experienced immense change, from transformative new technologies and innovative new logistics solutions to global supply chain challenges.

Our partners – In a dynamic business and an ever-changing global economy, collaboration is key to creating innovative solutions and achieving long-term growth. We are grateful for the role each of our partners has played in our story

Our employees – You are truly the backbone of our organization, and your commitment to excellence is what has made us a leader in the industry. Thank you for your tireless effort, your commitment to upholding our company values, and the uncompromising quality you deliver every day.

Our customers – You've had a tremendous impact on our success. Your support has been instrumental to our growth and long-term success, and we are committed to continuing to deliver solutions that exceed your expectations for another 20 years and beyond.

Here's to another 20 years of delivering excellence!

COMPANY INFRASTRUCTURE

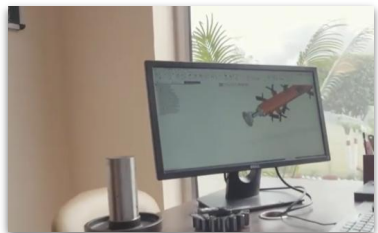

GARUD[®]
Future of Agriculture

The infrastructure of GARUD is extremely comprehensive with state-of-the-art-machineries and a high potential R&D wing all inside an area of 1,25,000 Sq. Ft. The production environment is accredited with ISO Certification.

We have an advanced machine shop complete with CNC turning Center, Drill machines, Lathes and other specialized machines. We have our own Fabrication center complete with CNC Press brakes, shearing machines, power presses, welding SPM's etc.

The plant has a state-of-the-art conveyORIZED in-house paint shop that leaves a durable and tough finish on our equipment. The process includes shot blasting, high performance electrostatic guns and oven baking for hardening and curing of paint. Our Assembly line uses the best available technology to ensure that our equipment's stand the test of best functionality.

The R&D wing is in the process of constant development. Our in-house testing facility has been provided with requisite tools and equipment's so as to facilitate easy detection of flaws at every stage of development and the finished product.

RESEARCH & DEVELOPMENT DEPARTMENT

GARUD is one of the finest agricultural implements manufacturer in India. In our R&D Department, we have a team of experts and engineers conducting pioneering work in various agricultural implements. We are committed to provide indigenous agricultural implements that are cost-efficient. Our R&D department always remains in touch with production and quality department to provide high quality products.

IN-HOUSE PRODUCTION FACILITY

At GARUD, we have in-house production facility with latest technology and qualified technicians. Our fast-paced growth is the output of our FARMER-centric approach.

In-house production delivers a host of benefits: new technical knowledge and expertise; shorter product development lead times; cost savings; better product quality and consistency; and improved security for sensitive corporate data.

No part of this catalogue may be reproduced, stored in a retrieval, or transmitted in any form or by any mean. The Company reserves right to change Design & aesthetics without prior notice due to our continuous R&D efforts for product improvements.

COMPANY INFRASTRUCTURE

GARUD[®]
Future of Agriculture

ASSEMBLY SECTION

Our Assembly section is fully equipped with state-of-the-art equipment to provide high quality products. In our assembly line we have in-house gearbox assembly, installed and fitted with special types of tools while tightening the bolts. We have experienced and well trained staff to maintain the quality and punctuality.

CUTTING & SHEAR BENDING

Our manufacturing unit is equipped with latest technology machines of the highest standards. Including Laser-Plasma Cutting Machine, Hydraulic Press and Shear Bending machines.

SHOT-BLASTING LINE

We have an in-house Shot Blasting facility for cleaning of metals like iron, sheets etc. before powder coating. Aid is provided for the treatment of surfaces through shot blasting. Due to that the quality of the product increases and the robust structure provides durability.

POWDER COATING LINE

We feature an in-house powder coating facility which enhances the quality of the product and leaves a durable robust finish that will stand up to harsh weather conditions. Because agricultural implements are exposed to rough conditions, it is constantly put to heavy-duty use. Our powder coating ensures to provide superior protection from ultraviolet light, dirt, moisture & heat while providing extreme durability and flexibility as well as insulating properties.

COMPANY INFRASTRUCTURE

GARUD[®]
Future of Agriculture

CNC AND VMC MACHINE

We have in-house manufacturing facility for Gears and their parts like CNC, VMC, Broaching Machine. All components are thoroughly inspected and checked for geometric accuracy. Such machines reduce the chances of human error and increase the level of production and quality.

ROTOR BALANCING MACHINE

The goal of rotor balancing is to reduce imbalance, reduces vibration and increases the efficiency and life of the rotor and bearings. Additionally, during production it is necessary to balance rotors before full assembly because there may be limited access to the rotor.

SPARE PARTS DIVISION

At the GARUD manufacturing facility, we keep the optimum amount of raw material and spares to maintain swift production. Our Spare part division ensures the availability of original Garud spares across all our authorized channel partners. An in-house gearbox division enables us to build long-lasting gear-driven products. Always use GARUD ORIGINAL SPARES for safety, performance and high value proposition.

QUALITY CONTROL DEPARTMENT

At GARUD, our Quality control (QC) Department ensures that the Agricultural implements process and operations run efficiently and guarantees the production of accurate and reproducible results. In addition, the QC measures that the agricultural implements are built as per international standards.
